

We hope you and your family are in good health. Our community has been through a lot over the last few months, and all of us are looking forward to resuming our normal habits and routines. While many things have changed, one thing has remained the same: our commitment to your safety.

Infection control has always been a top priority for our practice and you may have seen this during your visits to our office. Our infection control processes are made so that when you receive care, it's both safe and comfortable. We want to tell you about the infection control procedures we follow in our practice to keep patients and staff safe.

Our office follows infection control recommendations made by the ADA and CDC and OSHA. We follow the activities of these agencies so that we are up-to-date on any new rulings or guidance that may be issued. We do this to make sure that our infection control procedures are current and adhere to each agency's recommendations.

You may see some changes when it is time for your next appointment. We made these changes to help protect our patients and staff. For example:

- We will have you wait in your car instead of our waiting room. Please call or text when you arrive. If you are a new patient there will be paperwork hanging by our front door for you to fill out.
- Our office will communicate with you beforehand to ask some screening questions. You will be asked those same questions again when you are in the office.
- We have hand sanitizer that we will ask you to use when you enter the office.

We look forward to seeing you again and are happy to answer any questions you may have about the steps we take to keep you, and every patient, safe in our practice. To make an appointment, please call us at (903)839-6069.

Thank you for being our patient. We value your trust and loyalty and look forward to welcoming back our patients, neighbors and friends.
